BE THE ONES

WINTECARE®

Today more than ever before, obtaining outstanding results is the most secure road to professional success. We at WINTECARE are driven by one question: how can we start your journey down this road? Over the past ten years, people's habits have changed more than in the whole of the last century.

Social networks have shaken up even conservative sectors like medicine, having a radical impact on the actions they take. Everyday sees the launch of a new application, allowing users to not only review restaurants and hotels, but also give their frank opinion on health services and treatment centers. These technologies are moving away from what makes us human, in favor of automation. Having trawled through the seemingly endless mass of information online, patients are sometimes even led to believe they understand diagnosis and treatment better than the professionals. Public and private service reimbursements often aren't enough to cover costs. And of course, there are never enough hours in the day.

In this complex context, only those professionals recognized for their outstanding results can be successful.

Our job is to accompany you down the road to success, providing you with technology, knowledge, and products developed in partnership with experts from around the globe.

Do you want to be part of our network?

**be
the
ones**

PROGRAMS

The requirements of the healthcare sector are becoming increasingly complex. No longer do we simply talk about physiotherapy, osteopathy, aesthetic medicine, exercise and training: we now talk about integrated treatment programs.

The quest to feel good turns to various areas of medicine, sport science and nutrition for a solution, though when offered in isolation, treatments have a limited value. When strategically combined in results-driven programs, however, these techniques and technologies become extremely effective.

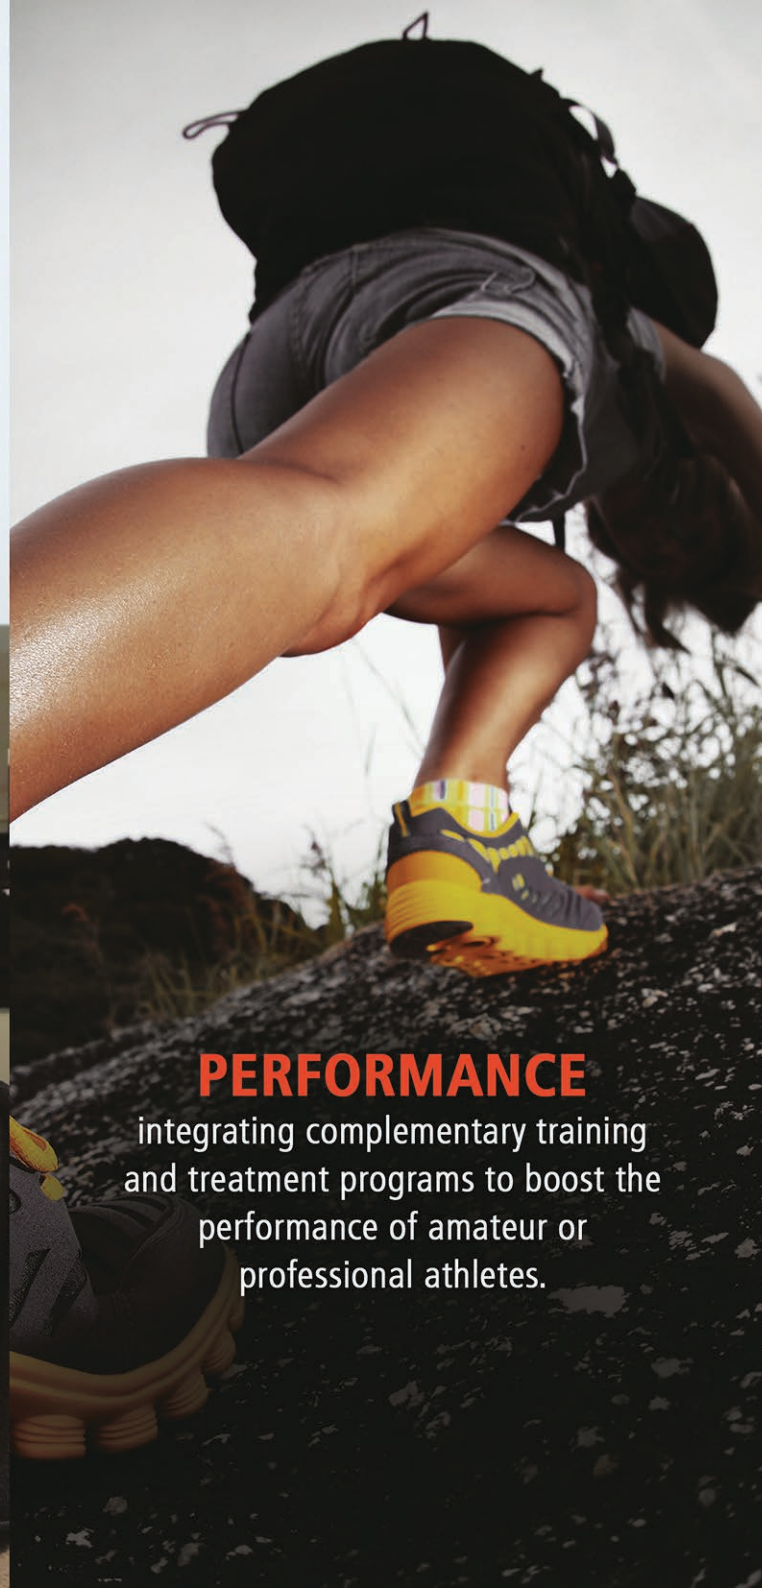

WINTECARE specializes in developing integrated programs for three areas of healthcare:
REHABILITATION, PERFORMANCE and **BODY CONDITIONING**.

Follow our Insights on **www.wintecare.ch** or visit our Facebook page to discover our tailor-made courses and content.

REHABILITATION

focusing on managing pain and inflammation.

PERFORMANCE

integrating complementary training and treatment programs to boost the performance of amateur or professional athletes.

BODY CONDITIONING

leveraging fat metabolism, liquid digestion, muscle tone and mass to improve the perception of oneself.

CORE TECHNOLOGY

How helpful is it to manage pain and inflammation quickly and effectively to restore full functional recovery?

How important to an athlete is improving training quality and reducing the pressure to perform by working on the circulatory system?

Is there a link between the circulatory system and cellulite, localized fat, and muscle tone?

In response to these questions, we've identified what is valuable to healthcare specialists and chosen the tools on which to focus our development.

Tecar technology has been used for many years in various areas of medicine, and recently we've seen a rise in the number of models from different brands with variable performance and price tags.

WINTECARE's specialist development of Tecar technology revolves around achieving two objectives – optimal results and value for money – such as to provide high-performing devices at accessible prices.

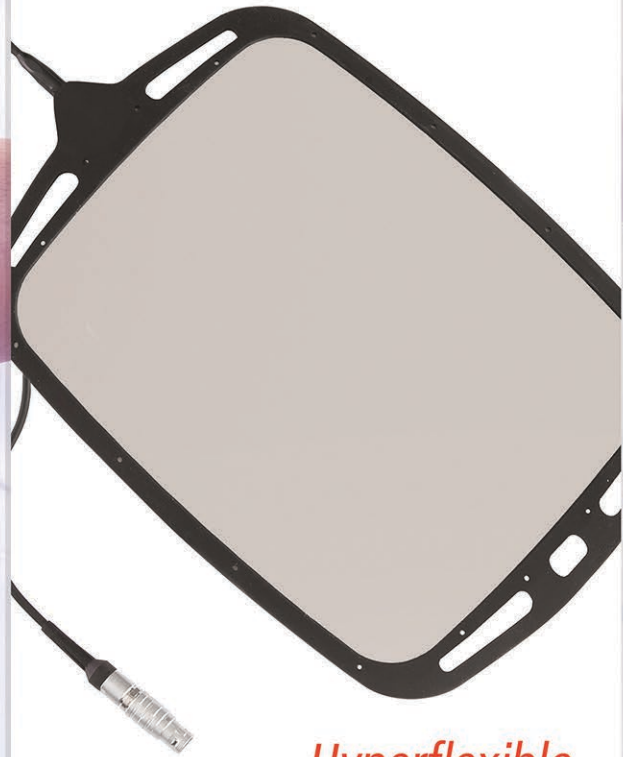

WINTECARE®

T-PLUS

T-Plus represents the state-of-the-art in Tecar technology.

Stimulating blood perfusion with electromagnetism, T-Plus accelerates the physiological processes underlying function recovery, achieves great results in terms of biomechanics, and improves metabolism.

*Hyperflexible
Plate*

*Ultra-Ergonomic
Handpieces*

*Hypothermic
and Hyperthermic
Electrodes*

Experimentation with materials, scientific analysis of the body's physiological response to stimulation and world-class engineering drawn from decades of experience in the field of radiofrequency put us one step ahead when it comes to what really counts: reaction speed.

Maximal nominal and effective strength, optimized contact surface, powerful capacitive mode that does not require conductive cream owing to the new coating material selected exclusively by **WINTECARE** and excellent micro-circulatory response even without heat are just some of the benefits offered by the new T-Plus.

In the hands of the expert, this model can make a huge difference when it comes to improving treatment result times.

For more information, visit our website www.wintecare.ch or write to us at info@wintecare.ch

Strengths:

LIGHT

EFFECTIVE

PORTABLE

you can even carry it with you in your flight hand luggage.

CAPACITIVE FUNCTION

means you don't need cream – it's effective, fast and safe.

ACCESSORIES INCLUDED

ACTIVE ELECTRODES

- 4 Resistive Electrodes
- 2 Hypothermic Capacitive Electrodes
- 5 Hyperthermic Capacitive Electrodes

NEUTRAL ELECTRODES

- 1 HyperFlexible Plate

HANDLES

- 1 Ultra-Ergonomic Capacitive Handpiece
- 1 Ultra-Ergonomic Resistive Handpiece

OTHER

- Remote control
- Power supply cable

FEATURES

MEDICAL DEVICE

CE certified, class II B

FREQUENCY

≈0.5 MHz

POWER – CAP VOLTAGE

450 VA - 600 V

POWER - RES VOLTAGE

300 W - 150 V

WEIGHT

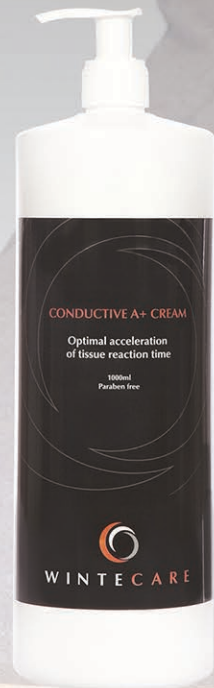

6,8 Kg

SIZE

50 x 27 x 19 cm

ACTIVE COSMETICS

*On a mission to speed up the body's physiological response to treatment, **WINTECARE** develops active cosmetics that transform every treatment into a pleasant experience patients will want to repeat.*

CONDUCTIVE A+ CREAM

1000ml

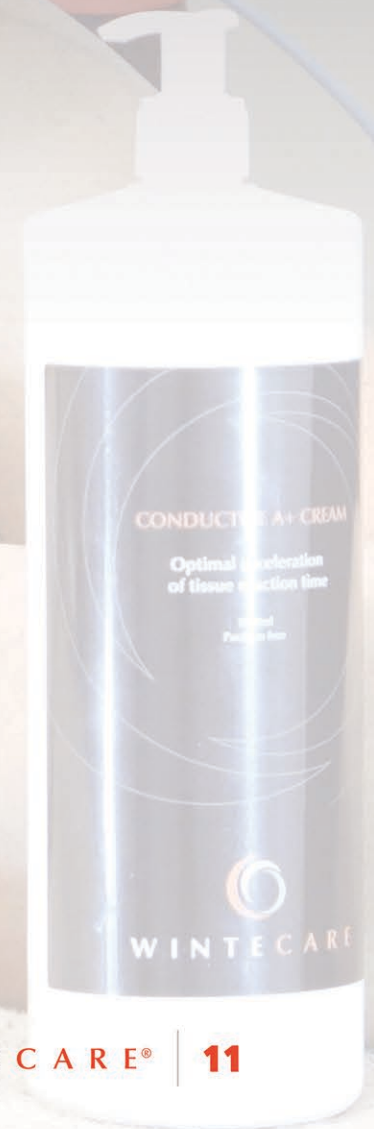

Improves skin conductivity and accelerates deep electrolyte mobilization for better Tecar results.

DERMOCLEAN SOLUTION

500ml

Removes resistive substances deposited on the skin to facilitate better skin conductivity for optimal Tecar treatment.

MYOFASCIAL OIL

50ml

Reduces muscle and joint mechanical resistance, making patients feel relaxed before treatment or after to encourage rest.

WARMUP OIL

50ml

Restores normal body temperature to the extremities, helping restore regular microcirculation to the area.

DRAINING OIL

50ml

Supports the work of the lymphatic ganglia located at the joints. Effectively drains and absorbs nutrients from the lymphatic system.

ENERGY OIL

50ml

Restores energy after a period of rest to help patients return to their physical activities with ease.

DRAINAGE A+ SOLUTION

500ml

Supports the lymphatic system to quickly drain lactic acid, catabolites, water retention and swelling.

ENERGY A+ SPRAY

150ml

Makes your muscles feel light and ready for exercise. Ideal for pre- and post-workout.

ENERGY A+ CREAM

200ml

Makes your muscles feel light and ready for exercise. Ideal for pre- and post-workout.

SEMINARS

Professionals attending our courses are results-driven, and committed to improving their knowledge in the areas of rehabilitation, performance and body conditioning.

We offer basic and specialist seminars.

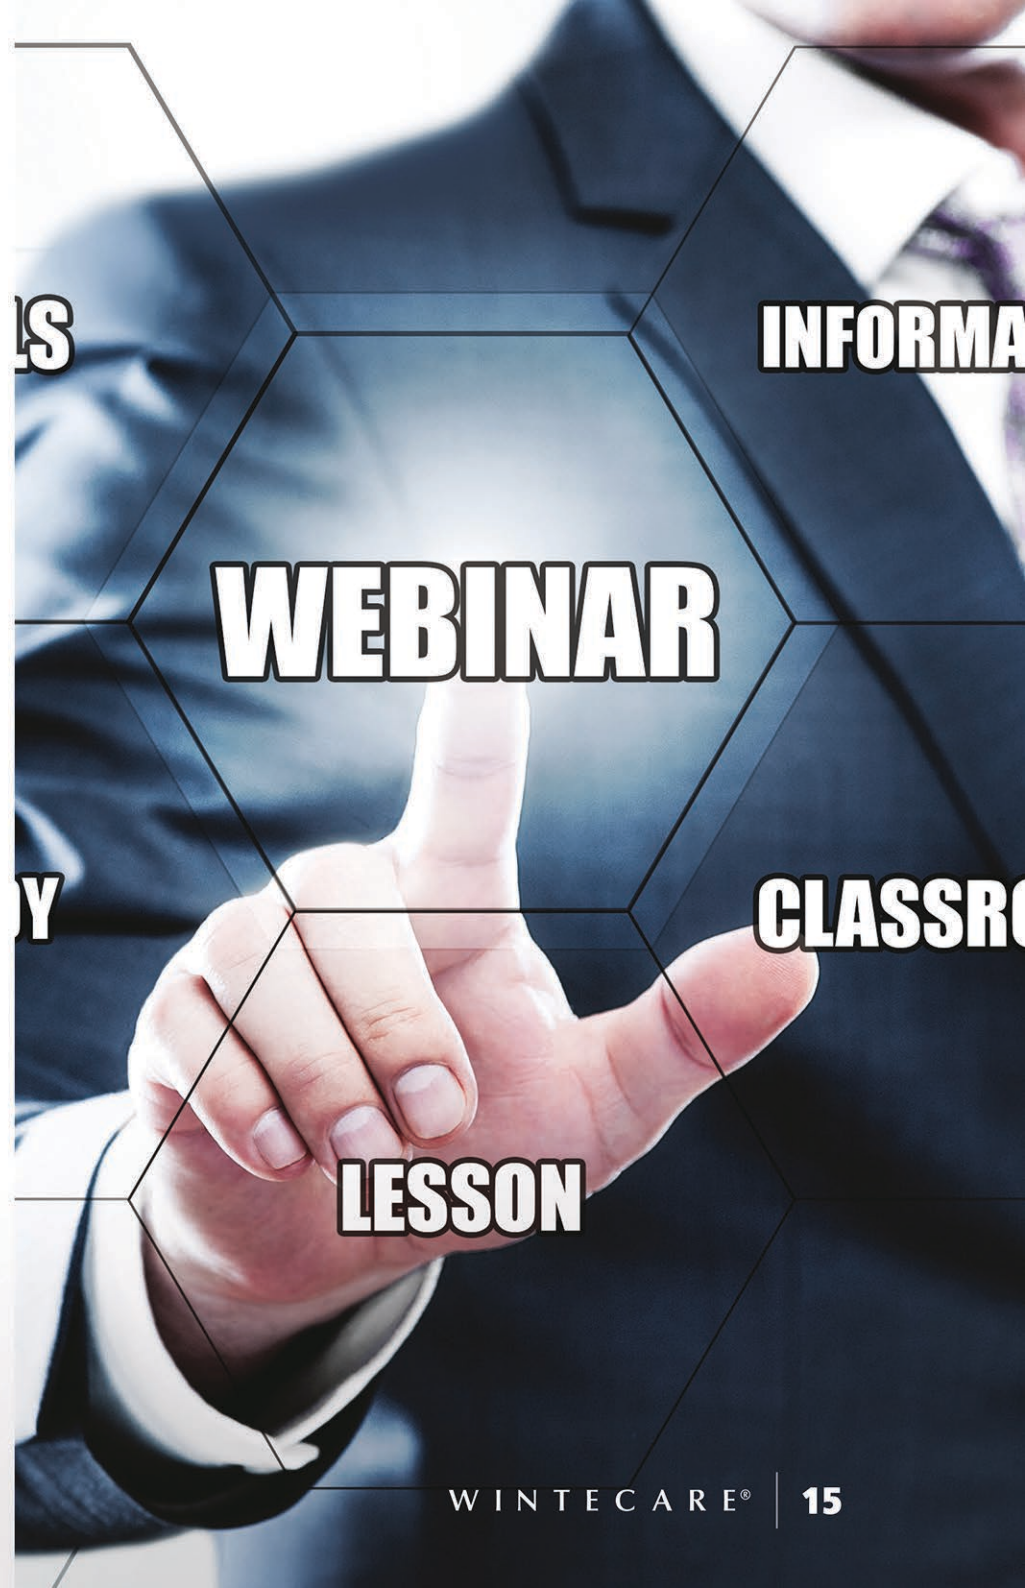

The **BASIC SEMINAR** covers the principles and *raison d'être* of programs and technologies developed and approved by **WINTECARE**.

The **SPECIALIST SEMINARS** provide in-depth knowledge on specific areas of application, contextualizing the use of appropriate **WINTECARE** programs and technologies.

Our courses are based on plausible and detailed treatment scenarios for training purposes. No medical information is provided. For more information about the "**WINTECARE** application program for LUMBAGO" or details about the other seminars scheduled for this year, visit www.wintecare.ch

Make sure you don't miss our WEBINARS, perfect for professionals wanting to enhance their knowledge without leaving the office.

Find out more about the program and sign up to the next courses by writing to info@wintecare.ch

RESEARCH

Empirical experience and scientific research are the two pillars at the base of our work.

The systematic review of the literature, general research and clinical research are the three areas our researchers work on day in day out.

Measuring and finding out more about the body's physiological response to the stimulation generated by our devices also forms the basis of our training information and the development of new technologies.

PARTNERS

Your own determination and skills aren't enough: you need to know you can count on trustworthy team-mates when you're on the playing field.

Targeted collaboration with companies, laboratories and brands that know more than us concerning specific areas is a benefit we offer professionals who choose **WINTECARE.**
